REMARKS

50X1-HUM

1. The airfields of Limon (O 51/F 95) and Milovice (O 51/G 62) were being improved and expanded. The Posista Firm, a nationalized enterprise, had charge of the construction work, which was being done according to plans prepared in the U.S.S.R. Since the plans had not yet arrived from the U.S.S.R., work temporarily followed oral instructions.
2. An area of 1,000 square meters on each field was to be graded daily. Construction work on the concrete runways had been started. The runways had a subgrade of 50 to 80 cm, which was filled with crushed stones and sand, and a cover of concrete slabs which were 24 cm thick by one square meter. The cracks between the slabs were filled with a tarlike paste. *

* Comment. This is the first information on the construction of the two airfields at Limon and Milovice.
